

### **PVC Printed 60x60 tiles**

In this kind of PVC panels, the coating isn't used for covering the panel, but the design, image or writing is directly printed on the panel and a UV layer is added on the panel for protecting the printed design. These panels are water resistant and their economic saving put the products of Kara Polymer Kaveh Company as the bestselling products. Possessing the glossy and hygiene surfaces, provide these panels with easy and quick cleaning and maintenance.

### **Advantages of PVC Printed Panels**
